Stimulant Use Disorder Train the Trainer: Treatment and Protocols

Thursday, September 11th
Friday, September 12th

Location: UMass Chan Medical School, Albert Sheman Center, 368 Plantation St., Worcester, MA 01605

Application: Stimulant Train the Trainer Application

Contact:
info@addictiontraining.org

Instructors: **Justin Alves**, MSN, FNP-BC, ACRN, CARN, CNE, **Vanessa Loukas**, MSN, FNP-C, CARN-AP and **Meg Hudson**, MSN, PMHNP, BC

Description: This train the trainer is designed to give addiction professionals the tools to disseminate education about evidence-based treatments and best practices for caring for individuals with stimulant use disorders (StUDs). Participants will review the epidemiology and impact of stimulants on society, how to recognize and respond to overamping events in the community and in medical settings, the available data regarding pharmacological management of stimulant use disorders and related health conditions, the evidence for different behavioral health interventions including contingency management, and strategies to incorporate treatment for StUD into already existing addiction treatment frameworks. Participants will practice and be prepared to deliver three different stimulant didactic courses at the end of the training.

Target audience:
- Healthcare professionals focused on prescribing (MDs, NPs, PAs, LCSWs)
- Individuals willing to implement Contingency Management
- Both current ORN Stimulant TA participants and new recruits
- Open to current ORN consultants and new/prospective consultants.

Credit Available

This activity has been approved for *AMA PRA Category 1 Credit™,* and continuing education credits for nurses, social workers, psychologists (APA & NYS), LMHCs, LADC/CADCs, and recovery coaches.
